# LEVEL CONTROL SYSTEMS

## Type E22

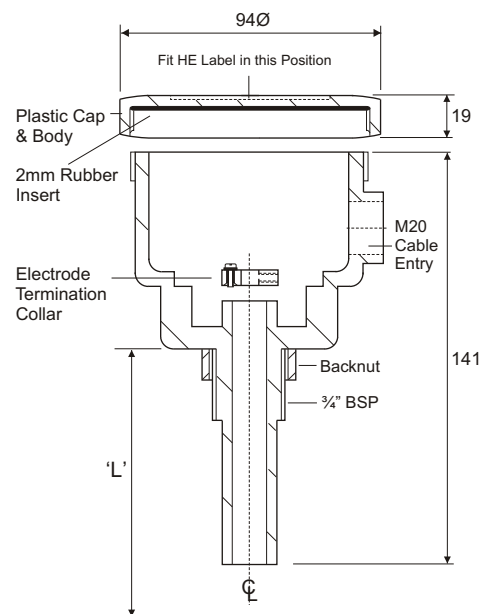

### Medium Duty Electrode Holder

For use with all Level Controllers & Alarms  
Operating in Aqueous (Conducting) Liquids  
i.e. Water, Acids, Chemical Effluent,  
Beverages etc.

- \* 3/4inch BSP P connection
- \* Corrosion resistant holder
- \* Suitable for 12mmØ electrodes
- \* Electrodes available for most aggressive liquids

**The Type E22 Electrode Holder** is suitable for conducting liquids such as water and chemicals, manufactured in corrosion resistant polypropylene and complete with a backnut. The holder will accept 12mmØ electrodes typically in 316L stainless steel, hasteloy C, monel, titanium supplied plain or plastic coated. Plastic coated electrodes are PPA coated WRAS approved No 0107503. Maximum shipping length is 3metres, couplers are available for lengths in excess. Steady brackets are advisable every 2m if turbulence is present. Electrode length is calculated from the underside of the body (add 24mm). A pressure type version is available on request. ATEX approved models available for use with P7/IS level controller.

Because of continuing development we reserve the right to change the specifications without notice
